

Model No: LD-BC16-P4M

- LD-BC16-P4M is DALI-MODBUS converter,bidirectional send command;
- Manual gateway address setting, up to 16 gateway addresses with DALI power supply.

- High voltage power supply (AC220V)
- With manual gateway address setting, up to 16 gateway addresses (0-F)
- With receiving indicator (one flash/ one command)
- Small size, easy to install

Model No	LD-BC16-P4M
Brand	LAMMIN
Input Signal	MODBUS signal
Input Voltage	AC 220V
Output Signal	DALI signal
Gateway Address	16*addresses(0-F)
Certification	CE
Working Temp	-20℃~+50℃
Warranty	3 years
Size(L*W*H)MM	54*88*65
Installation	35mm DIN rail

- 1) Working power AC220V
- 2) Gateway address selection
- 3) Working indicator
- 4) DALI signal
- 5) MODBUS signal
